

 **TEKWAVE Solutions**

TEKWave Commercial VMS

Integrated Visitor Management, Access Control, and Remote Entry System

Why Visitor Management?

Improve Security

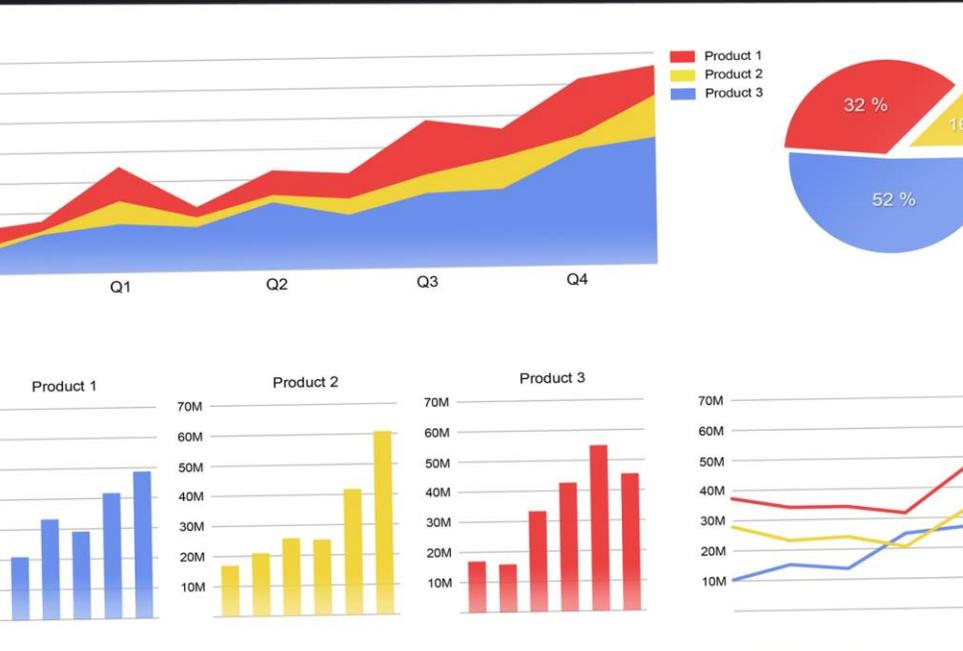

- Screen and validate visitors and contractors
- Produce credentials for visitors (i.e. passes/badges)
- Process vehicles with multiple passengers

Improve Efficiency/Communications

- User-friendly Interface accelerates visitor processing
- Pre-registration of Visitors
- Automatic notification of arrivals

Reporting

- Logging and tracking of all transactions
- Quick look up of visitor details
- Real-time information exchange between Officers/Admin

System Overview

- Single or Multi Post per site
- Cloud Based – Shared System
- PC or tablet at customer site to access data
- Software is cloud based
- Duplicates made of every record on a separate server
- Web Based
 - Allows for remote administrators to connect to add/modify/delete information and to run reports
 - Officer connects via internet on PC or mobile device
 - Global access with no limit on data storage
 - Activation of new site requires no local software download

Officer Interface

Officers may use a Tablet

- Package comes with mobile, wireless, driver's license scanner.
- Signature capture with the touch screen
- Take pictures with built in camera
- Large buttons and Text create a User Friendly Interface
- Quick search options for last name, first name, address, PIN, etc.

Officers may use a desktop PC

- Package comes with a desktop driver's license scanner, signature capture, and web cam
- Any brand PC, all that is needed is a web browser
- Simplified interface assists in quick adaptation and ease of use.

Photo Capture

- Web Cam makes it easy to capture a photo from drivers, visitors and contractors to store with your permanent transactions
- Very easy work around for individuals visiting your property without a driver's license.
- Picture can be used to print on a Visitor Identification Badge.
- Transaction logging stores all of this information for historical needs in an encrypted format

Visitor Pre Registration

Pre-Register Visitors

- Web Scheduling
- Host Application
- Deny Visitors

Manage Personal Information

- Phone numbers
- Comments
- Vacation Notices
- Store Photo for Officer familiarity
- Advanced information for faster verification

The screenshot shows a mobile application interface for adding a new visitor. At the top, there is a red header bar with a back arrow on the left, the text "Add New Visitor" in the center, and the time "1:19" and status icons (airplane, Wi-Fi, battery) on the right. Below the header, there are several input fields: "First Name", "Last Name", "Company Name", "Host Address", and "One-Day Visitor". Below these fields, there are two rows for scheduling. The first row has "Schedule Date" with a date picker showing "4/10/2019" and "Add Time:" with a toggle switch set to "OFF". The second row has "Expiration Date" with a date picker showing "4/10/2019" and "Add Time:" with a toggle switch set to "OFF". Below the scheduling fields, there are three more input fields: "Contact Email", "Contact Phone", and "Notes". At the bottom of the form, there are two large buttons: a red "SAVE" button and a dark grey "SAVE & SEND E-PASS" button.

Administrative Access

Administrators have access to manage all facets of the program, including:

- Adding, removing, and modifying users
- Run Reports and export them to Excel, PDF, Word, CSV
- Manage Alternate Destinations and Offices/Suites, Visitor Types, Statuses, etc.
- Manage Watch List and automatic denial.

Package Tracking

- Package Tracking:
 - Track Packages that are delivered to a front desk or gatehouse. Check the package out when the host picks it up.
 - Admission Notification can be used to alert a host that a package has arrived to be picked up.

Barcodes: Activity Management

Barcodes & PIN

- **Mobile Lookup**
 - Scanning a Barcode with the mobile device allows security to see pertinent information about the vehicle or truck driver
 - What are they dropping off
 - Where should they be
- **Egress Tracking**
- **Check In/Check Out**
 - Instantly know who is onsite
 - Time & Attendance Tracking for Visitors and Contractors

Vehicle Pass & Visitor Badge Printing

- Passes & Badges printed on high speed thermal and thermal transfer printers
 - Will not fade!
- Prints in 4-5 seconds
- Passes Include:
 - Directions
 - Visitor Name
 - Host name
 - Expiration date
 - Optional bar code for egress tracking
- Badges Include:
 - Visitor Name & Photo (if scanning driver's licenses)
 - Host name
 - Expiration date
 - Optional bar code for egress tracking

License Plate Recognition

- Increased gatehouse efficiency, reduced vehicle backup
- Seamlessly integrates with the visitor management software
- System uses optical character recognition to capture the vehicle license plate
- Allows for compliance of all vehicles on-site

Integrated Access Control

- Remotely monitor and open gates and doors from any web browser
- Automated software functions reduce visitor and employee admission times
- Combined with our cloud-based Visitor Management software, guards can perform all functions from one centralized location

Real Time Reporting

Visitor Transaction Log

- Complete details on each and every visitor

Gate Statistics Report

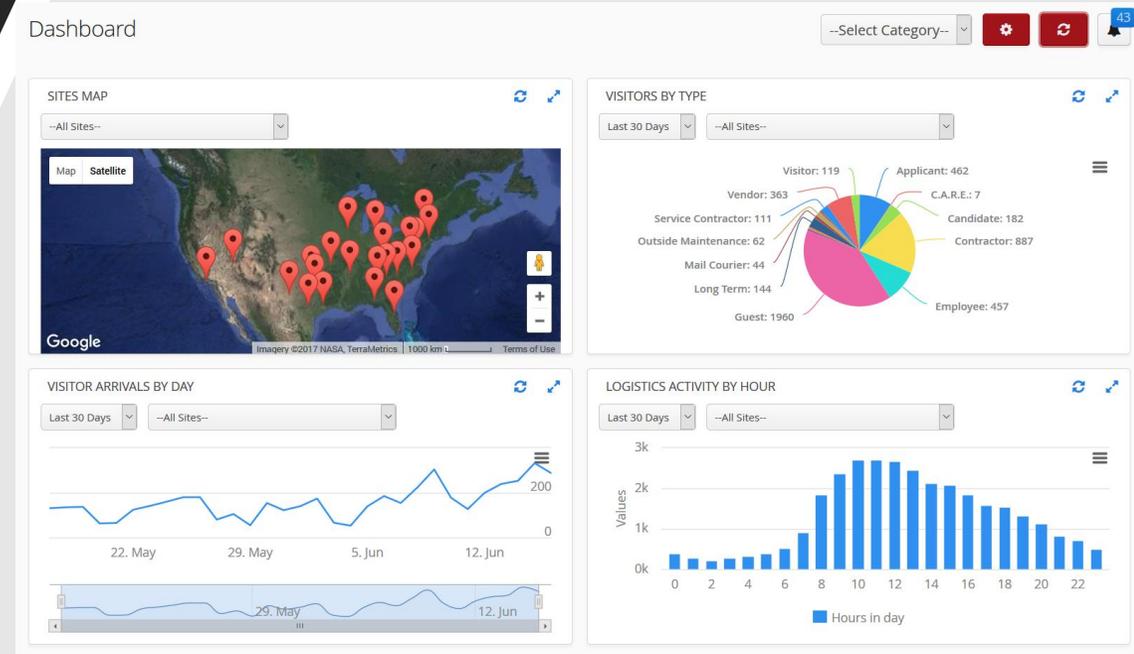

- How many visitors passed through each gate during each hour

Employee Listing Report

- Name, address, phone number

Comprehensive User Profile

- Print on demand for complete details on each User.

Sample Visitor Report

- Logs each and every transaction related to visitors and/or employee access
- Tracks:
 - Who entered visitor for admittance
 - Who is hosting the visitor
 - Much more
- Which officer admitted visitor and through which entry point
- Retains scanned driver's license data
- Search and reporting capability
- Export to Word for further use

Visitor Kiosk

- Allow visitors to admit themselves.
- Capture quick and easy information.
- Allow profile pictures to be taken and signatures to be captured with a “terms and conditions” policy of the clients choosing.
- Allocate human capital at more needed areas.
- Optimizes and streamlines visitor management.

Additional Modules and Features

*Visitor Management Voicemail

- Call into our toll-free number to leave a voicemail and pre-authorize a visitor.

Configurable Terms and Custom Fields

- Terms throughout the system may be customized to the site. Custom fields may be created to collect more information from particular visitors.

Portfolio Management

- Manage your locations by region, branch, account, etc.

BOLO Watch List (Optional Site Level)

- *An external database service that checks against a nationwide criminal watch list
- An internal watch list that checks a pre-defined set of records inputted by the community

Location License with Site Filtering (Optional)

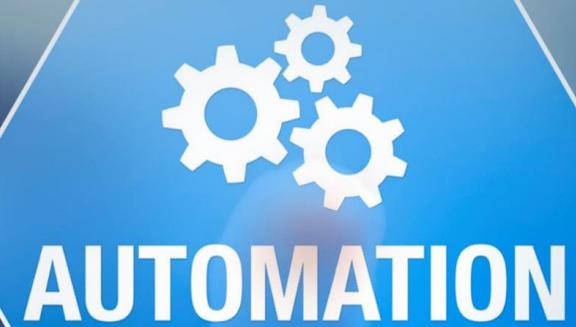

- Filter data so officers at security check points only see information pertaining to their area.
